

TWENTY-SECOND YEAR No. 2

GLEICHEN, ALBERTA, WEDNESDAY,

APRIL 28, 1928

APRIL 4

SUBSCRIPTION \$2.00 PER YEAR

Town & District "Yimmie Yonson's Yob" CAPT. DANCEY RETURNS HERE

Splendid Show

Arrowood is a busy place these days

Next Friday is Good Friday and a public holiday as is also Easter Monday.

Mrs. W. W. Brown returned home Sunday after spending a week with friends in Calgary.

If you want to say anything a few lines under our "Miscellaneous" just send it along and we'll do the trick.

There are still a few delinquent subscribers on the Call list but most have consented to remain there.

The hum of the separators were in evidence on Monday, but the "beautifull" put a damper on it Tuesday morning.

Good crowds are attending the motion pictures every Saturday night and real good scenes are being produced.

We are getting along quite nicely without that fall of the beautiful Tuesday morning—but that's not our job yet.

Under the auspices of the Queen's town Ladies Aid Miss Seigel will give one of her popular recitals in the Co-operative Hall on Friday, April 13th.

All ready for the big Easter Dance next Monday in the Gleichen Community Hall under the Women's Auxiliary of the Canadian Legion of the B.E.S.L.

H. L. Dowle returned last week from spending the winter at his home in the states to start work on his various farms and also complete threshing.

The ladies of St. Andrew's, W. A. are having a spring sale in the Room of the Canadian Legion Hall on Saturday April 28 at 3 p.m. Many useful and dainty aprons will be on hand. Easter plants will also be sold and a dainty tea will be served for 25c. A welcome for all.

ST. ANDREW'S CHURCH SERVICES

Rev. F. M. Ross Gibson in charge

APRIL 28, 1928

EASTER SUNDAY

Holy Communion 9 a.m.

School Service 11 a.m.

Evening Prayer 7:30 p.m.

Fri. Evening Prayer 7:30

Germination tests of wheat which has been sown in the spring show that it has hardly been damaged. If there is a widespread planting of this spring threshed wheat disastrous result will follow. Authorities are being urged over the manna and urge farmers to have their seed tested for germination.

We rather regret the major added "cost for publication" in some of his remarks of admiration of the "Yimmie Yonson" show, which he alights qualified as the best he ever saw in Gleichen.

J. O. Bogart states that he believes the new school building will never last. Saturday brought the best prices obtained at auction for several years past and that he was well satisfied with results. Although some of the animals did not bring all he expected others made up the deficiency.

The number of children of the United Church School Board in the Gleichen Hall of Education is at a social destined for ladies only at the Mass on Tuesday evening. Some thirty mothers were present, with Mrs. Hutchison and Mrs. Eason than enting with some of the songs. Mr. J. R. Robins gave a few numbers on the mouth organ which were much appreciated. Good sale followed and last, but not least, and the "Irish Night" came on with the singing of "Auld Lang Syne."

Dr. G. H. Bogart declared that excesses plane brought on severe nervous disorders. Particularly among those who have to listen to it.

Jack Moss has disposed of his farm to G. T. Jones and T. H. Beach will offer his livestock, farm machinery, etc., for sale by auction next Wednesday, April 11th. Read his ad in this issue.

Dr. G. H. Bogart

That the Mississauga Dramatic Society come down "Yimmie Yonson's Yob" staged in Gleichen by amateurs is frankly admitted by all who attended the Community Hall last Friday night.

The only regret is that there was not a packed hall, which was due to other reasons, those being no less than three other dances that night.

One gentleman who resides in Calgary states he had not seen a better production in the city.

But many others were most enthusiastic the next day boasting of the arts.

The schedule of meetings will be practically the same as the previous year, but the addition of a new feature will be the monthly meeting of the Gleichen Legion, which will be held at 3 o'clock.

The event program is scheduled for the month of April.

There will be a number of interesting features in addition to the coverage of the programme for the return visit to Gleichen by Captain Dancey, April 1st.

The schedule of meetings will be practically the same as the previous year, but the addition of a new feature will be the monthly meeting of the Gleichen Legion, which will be held at 3 o'clock.

Gleichen determined to go to the top in shape in this great national program, and toward that end no effort will be spared to make sure success.

The Gleichen Legion will enter Captain Dancey, at an informal dinner, at 8:30 p.m. just previous to the regular meeting.

The King of Glory will have a special program for the veterans and their families.

The Board of Trade luncheon will follow and wives of members.

Send your ad changes in every Monday morning.

The Ian C. G. L. T. meeting was held at Mr. Riddell's on April 2nd.

Those old Puritans would have enjoyed the title of the current song "Big Blue Heaven."

At Medicine Hat aldermen are to be paid \$20 each for regular meeting. If this was tried in Gleichen it might not be so difficult to get candidates for our Council.

It was decided to give an Easter Service on April 1st to go towards paying for the C. G. I. T. rings for the Wholeboles. This tea will be held at Mrs. Riddell's home on Wednesday, April 11th, from 3 o'clock till 6:30. A charge of 35c.

The King of Glory shall come in Lovers

Communion and Reception of members.

ARLINGTON—

10:30 a.m. Easter Service.

CLINTON—

2 p.m. Sunday School.

2:45 p.m. Easter Service.

ERNEST JACKSON

ADDRESS WANTED

BY HILARIOUS IN ENGLAND

The address of Ernest Jackson

is wanted by his sister in England

as he has not written home for

months. Box 222, Gleichen, according to a letter received by Const.

Van Kirk from Miss M. D. V. Jackson.

Information of Ernest Jackson

should be addressed to

Const. Van Kirk, Gleichen, Alberta.

Some of the funniest things we

hear are said by the people who take

themselves seriously.

The Russian novelist, Fedor Dostoevsky, died a simple and easily

remembered pen name, hit on that of

Kazimir Petrenkov.

Jack Moss has disposed of his farm

to G. T. Jones and T. H. Beach will

offer his livestock, farm machinery,

etc., for sale by auction next Wednes-

day, April 11th. Read his ad in this

issue.

Dr. G. H. Bogart

Dr. G. H. Bogart declared that excesses

plane brought on severe nervous

disorders. Particularly among those

who have to listen to it.

Jack Moss has disposed of his farm

to G. T. Jones and T. H. Beach will

offer his livestock, farm machinery,

etc., for sale by auction next Wednes-

day, April 11th. Read his ad in this

issue.

WORLD HAPPENINGS BRIEFLY TOLD

Official British attempts will be made this year on the four principal world markets, Canada, Australia, India and the United States.

The Government will organize the Federal Rural Credits Board within the next two months, according to officials of the Department of Finance at Ottawa.

Lost on the wind-swept wastes of the fifty-mile portage between the Bow River and the Yukon River, miners of Holt Creek, Alaska, were won to safety by the lead dog of their team of huskies.

Astrometeorologists are deeply interested in the discovery that the star, Nova Pictoris, first discovered in Siberia in 1923, has split in two. Details are being closely studied by astronomers.

The collapse of the St. Francis dam in Los Angeles county, March 13, was due to defective foundation, it was asserted in the report of the government's committee investigating the disaster.

Trans-Canada. The Western plan of Parliament was recommended by the independent government in the new agreement between Trans-Canada and Great Britain made public on April 1.

Funeral services of the utmost simplicity were held yesterday at the Anglican cathedral of St. John the Baptist. At the request of the nation's picture actresses, only intimate friends and relatives were invited.

There was a moderate gain in employment at the beginning of March, according to the monthly statements furnished to the Dominion Bureau of Statistics by 62.4 per cent of the largest employers in the country.

The battle flag and King's colors as well as the regimental colors of the 56th Battalion, Canadian Expeditionary Force, were there to participate in the tercentenary celebration of William Harvey's discovery of the circulation of the blood, at Jefferson Medical College.

The entire face of medicine has changed, said St. Humphry, who added that there had been greater progress in the last 50 years than in the preceding 500 years. The future would rather be aimed at preventing than curing disease.

Growth Of Wheat Pool

Grain Receipts Show a Large Increase in Deliveries

Nearly \$28,000,000 was recently distributed as an immediate payment on wheat sent by the Canadian Wheat Pool to the Provinces of Manitoba, Saskatchewan and Alberta and to grain in Manitoba and Saskatchewan to the 140,000 members of the Pool.

The Pool made a straight payment of 50 cents per bushel on each bushel of wheat and flax. An interim payment for coarse grain was made last January on behalf of the provinces on units up to 50 cents per bushel; 65 cents a tonne for barley and 85 cents a tonne for oats.

Over \$800,000,000 has now been distributed by the Canadian Wheat Pool since its organization in 1923. Total grain receipts of the Pool for the year show a large increase in deliveries over any previous year and a still greater increase in the amount of grain handled through the Pool's elevators.

For the month of April, which began April 1, 1927, the Pool handled more than 180,000,000 bushels of wheat which is nearly double the amount delivered to the provinces during the same period.

Astronomical studies are deeply interested in the discovery that the star, Nova Pictoris, first discovered in Siberia in 1923, has split in two. Details are being closely studied by astronomers.

The collapse of the St. Francis dam in Los Angeles county, March 13, was due to defective foundation, it was asserted in the report of the government's committee investigating the disaster.

Trans-Canada. The Western plan of Parliament was recommended by the independent government in the new agreement between Trans-Canada and Great Britain made public on April 1.

Funeral services of the utmost simplicity were held yesterday at the Anglican cathedral of St. John the Baptist. At the request of the nation's picture actresses, only intimate friends and relatives were invited.

There was a moderate gain in employment at the beginning of March, according to the monthly statements furnished to the Dominion Bureau of Statistics by 62.4 per cent of the largest employers in the country.

The entire face of medicine has changed, said St. Humphry, who added that there had been greater progress in the last 50 years than in the preceding 500 years. The future would rather be aimed at preventing than curing disease.

Average Wheat Production

Average Production over Five Years Period in Three Prairie Provinces

According to the Dominion Bureau of Statistics the average production in the three prairie provinces in 1927 was 17.5 bushels to the acre, Saskatchewan, 17.3 bushels to the acre, and in Alberta, 17.2 bushels to the acre.

The average price per bushel in the same period was respectively \$1.00, 97c and 94c. The average price per bushel for the three provinces in 1927 was \$1.75, \$1.75, and \$1.76.

Should Spend A Fortune

Seventy dollars per head was spent by Canadians last year on United States goods. The amount spent is great, just as good goods are produced at home. Some day there will more than double the amount.

According to the Canadian government it is necessary to them selves and their own country.

Nonresidents Buy Articles

That nonresident will enable him to travel to America after dark without their pilots knowing they are under the law of the Empire, except a few of them.

"I am a man of interest," said Bert. "Play a keen interest, do a little fishing, go to the mountains for a few months in the winter, run around to conventions, a good deal, just to see what I can see."

Bert must have inherited more than a place like that. He could not ask him what he had been doing all these years, he was rather quiet. "I am a man of interest," said Bert. "I am a man of interest."

"Remember Sarah, Mrs. Mills?" Bert asked. "I am a man of interest." After a few minutes' conversation, he'd been glad to see you, just as I am. Bert is a man of interest. She comes down every little while to shop."

"I am a man of interest," said Bert. "I am a man of interest."

"I am a man of interest," said Bert. "I am a man of interest."

LESSON No. 100

Question: Why is emulsified cod-liver oil so important as an added ration with milk in the diet of children?

Answer: Because when it is mixed with milk it makes milk a more efficient rickets-preventing food and builder of strong bones. Children like it best in the form of

CHAPTER XIX.—Continued.

It was strange for Arthur Warner, after all his lonely years, to be sitting here talking so intimately to a woman who was a comparative stranger, and receiving from her confidences which she had given to no one else. He thought of his own lonely house—so precious to him, so eagerly acquired, so patiently worked for—how a woman like this would have brightened it and graced it with her presence. She was so calm, so brave, so gentle.

When their eyes met Helmi smiled encouragingly at him, though sadly too, as if the tears were not very far away. Were they tears because he was going?

"Helmi," he said, "we are both facing the elemental things of life, and it draws us together. We are facing the hardest things that men and women ever have to face. Your part will be to give life, maybe at the expense of your own. Mine is—God forgive me—to take life. Are you afraid?"

Helmi shook her head. "No," she said, simply, "I believe in God—I believe He loves me. I love Him. Every day I say my good words. I learned them in His house. They are, 'Cherish health; Seek truth; Know God; Serve others.' Then I say, 'Please God, bring home my Jack.' It is good to pray, Mr. English, when one is afraid."

The first ragged whistle of the train came booming down the valley. "Tell me your name Helmi," he said, "I want to say good words for you and for your Jack."

Helmi took his hand and impulsively kissed it. "Helmi Doran," she said. "I am glad you will say good words for my Jack. Maybe you will see him over there—I know he will go."

"I hope for your sake that it will all be over when Jack comes home at Christmas."

He was standing up now with his cap in his hand. The train was whistling again as it came slowly down the grade. Helmi looked at him reverently.

OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and a three weeks' stay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I thought sure there could not be any help for me. I had very severe pains in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of the Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sanative Wash."—Mrs. L. LAJEUNESSE, Box 103, Coniston, Ontario.

W. N. U. 1727

Recently. It was not merely a lonely, weather-beaten homesteader she saw standing before her; she saw a brave man who was willing to give everything he possessed, not withholding his own life, for the cause of human liberty, and on his face she saw the unmistakable majesty which comes to those who are appointed to die.

Arthur Warner bent over and kissed her shining hair. "Good-bye, dear Helmi," he said.

"Good-bye, God bless you, dear Mr. English!"

When Arthur went out he met Mrs. McMann coming in. She had come presumably to ask Helmi what she had done with the tape-line.

CHAPTER XX.

It was in December that Helmi decided to delay no longer, she would go to the city. Jack had told her to go to his mine boss and get the two hundred dollars which was due on his wages. She had not needed it until now, and had felt it best to leave it where it was. She had hoped her Jack would be home to her before this, and then he could go himself. Helmi had earned seventy-five dollars from Mrs. McMann, too, and she had often imagined the proud look which would come to Jack when she would show him the fifteen five-dollar bills in the pocket of her black valise.

Helmi knew what she was going to buy with it, too. Had she not marked things in the catalogue? But the days had worn wearily on and there had been no word. It was often hard to keep from crying, but it must be all right—God would not let her dear Jack be lost.

The Blue Book was a comfort, too. It was so full of happiness. The Blue Book was sure everything would come out right. She wondered if the people who wrote the Blue Book ever had their men go away so far and stay so long. She had found the Blue Book was right in what it said about gardens. It said a garden looks well with God. Helmi had been happiest in her little garden, every sod of which she had turned herself. In the summer evenings she had worked there until it was so dark she could not see, and never did sad thoughts come to her then.

Helmi took it as a sure sign that God was pleased with her when her plants grew so beautifully and the hail-storm which broke windows in some of the houses did not touch her garden at all. Helmi was proud of her garden, too, because it was the first garden in Eagle Mines, and also because the women said nothing would grow. In that way her head lettuce, radishes, onions, cabbage, carrots, and beets were something of a triumph. But best of all was the square in the middle, where stocks and asters and nasturtiums grew. Every day there were bouquets from her garden on the tables at the boarding-house, and although they were nothing like the flowers which Mrs. McMann herself had grown in Lincoln, Nebraska, either in color or perfume, yet even Mrs. McMann admitted they were very nice flowers as flowers go in Canada. Helmi did not mind what Mrs. McMann said. She and the mountains knew they were wonderful flowers. The mountains had looked down upon her so kindly all summer, she knew they were pleased.

There was no dearth of praise among the men, who were glad to have fresh instead of canned vegetables for their meals, and twenty-four dollars was the sum Helmi had in the pocket of her black valise to prove that her garden had been a success. Even after the vegetables were done the asters and stocks flared and bloomed, and Helmi hoped that by some chance Jack would come in time to see too. They seemed to grow more showy and brilliant as the night frost drew nearer and nearer. But one night, while she slept, the frost slipped down the mountain, without a sound, and laid low every stalk and every bloom in her garden, and having done its work went back the way it came. The morning sky was blue and bright, the sun was warm, and playful little breezes turned the dead flowers over, just to be sure that none were missed. When Helmi came out and saw the work of the night she wrung her hand—but only for a minute. That day she raked the dead stalks into a pile, and she burned them when they were dry and dug the garden for her next year's planting.

Helmi nodded, her heart was beating in her throat so painfully she was afraid he would see it.

"Well, then, you're all to the good. But I just thought I would wish you up on what was goin' round. We're all for you, Helmi—you know that!"

Women, Your Manifold Duties Require Strength

St. Catharines, Ont.—"During my early married life Dr. Pierce's Favorite Prescription was very helpful to me as a tonic and nervine. I had become all rundown, my nerves were all upset, I could not sleep, and was weak and miserable. I was advised by my mother to try Dr. Pierce's Favorite Prescription and it relieved me of the nervousness and made me a well, strong woman. Since then I have always recommended it to weak women."—Mrs. M. F. Slack, 5 Francis St.

Ever tried Dr. Pierce's Pleasant (laxative) Pellets? 60 Pellets for 30c.

"These foreigners haven't got any fine feelings," Mrs. McMann told her

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

Helmi thanked him without knowing what she was saying, and got out of the office some way. The little street of houses seemed to be all eyes; all red-lidded eyes, staring and pointing at her; voices whispering closing in on her as if they would and mocking. The mountains were gladly grind her to powder, and the river—the river was the worst of all as it ran slithering by so green and deep and cold. A man had drowned himself at one of the other mines last week because his wife had taken his money and run away, and now Helmi knew that wasn't the reason at all—it was because the river had taunted him so, and mocked him, and dared him to it, and driven him to it.

Helmi reached her own house, and, going in, shut and locked the door. She must think! A basin of water stood on the box. She buried her hot face in it to try to stop the tears that were burning in her eyes. The heart-beat in her throat seemed to choke her.

"Oh, Aunt Lilli! Aunt Lilli!"

But it could not be. Her Jack Doran was a good man. God was good. She sought the Blue Book anxiously;

"Oh! to be a girl and see

Beauty in flower and bird and tree;

To pass through, strong and pure and good,

The gate which leads to womanhood."

She read it all with a heart that grew heavier and heavier. It was not for her at all. She was no longer a girl. She was a woman, with a woman's heartache, old as the world, black as night, and deep as the deepest sea.

One day she went to the stuffy little office and spoke to the timekeeper about the wages Jack had not taken. The timekeeper sat in his shirt-sleeves making out his accounts. The place reeked of stale tobacco, and dust lay gray on the window-sill. Quite frankly Helmi explained her reason for going to the city.

The timekeeper looked confused and embarrassed. "I'm awful sorry, Helmi," he said, "but it looks as if there has been a mistake here some place. There was two hundred dollars owing to Jack when he left, but a man came one day with an order from Jack and I gave him the money. He said when Jack got to Peace River he found there were some things he needed. It was about a week after Jack left, if I remember—I have the order here, if you would like to see it. You see, I didn't know you would be wantin' it, or anything, or I would have refused this fellow, but he had the order and I couldn't very well do anything but pay the money over."

The nausea that came over Helmi made her sway uncertainly, but she caught the back of a chair and managed to say, "Oh! it is all right; Jack left me lots of money; I really do not need it. I just thought I had better take it with me." She was holding her lips very tightly so they would not tremble. She even smiled, winking very quickly to keep the tears back. "I expect to meet Jack in the city," she resumed. "He has forgotten to mention to me that he sent for the money—but it is quite all right. I have plenty. Goodbye, Mr. Hamilton. It looks like snow, does it not?"

Helmi turned away quickly. The timekeeper called her back. "Say, Helmi," he began awkwardly, "don't think I am buttin' in or the like of that, but I just wanted to put you wise. That old bird of a magistrate at Bannerman has been shootin' off his mouth. It seems he claims he knows a lot about you. If he says—Oh, well, I don't need to repeat what he says—he is drunk most of the time, and nobody should mind a word he says; but he declares you and Jack ain't legally married at all, and he insinuates that Jack sort o' tipped him off. Oh, I don't know the ins and outs of it, but I just wanted to warn you to hang onto your certificate, and then in case of a frame-up you have the deadwood on them all. You have the certificate, have you not?"

Helmi nodded, her heart was beating in her throat so painfully she was afraid he would see it.

"Well, then, you're all to the good. But I just thought I would wish you up on what was goin' round. We're all for you, Helmi—you know that!"

Anyway, she would be brave. Next day was train day, too, and he might come. Twice a week the train came down to Eagle Mines from the main line. Helmi had so often watched it coming in, her heart in her mouth, that she had grown to dread train days, for during the last few months at the first ragged whistle that came wearily piercing the valley a violent nausea had seized her. As she now drew near her destination it came again. She thought of the Wymuths and their awful philosophy. Was all this part of her punishment? Was it all wrong? Had she done wrong? But still, everyone who was in the world had come the same way. Surely God wanted people, and yet, why did he punish women so? She sat still a while, letting the horse feed along the side of the trail.

The flat, stale taste which you sometimes find in tea may be due to the package it is put up in. Red Rose Tea is of such fine quality that no chances are taken. It is packed in aluminum, the only material that gives complete protection against dust, dampness and deterioration. S.W.

magistrate in Canada has a copy of this."

"Did Jack see this?" Helmi asked after a pause.

"Yes, I showed it to him while you sat outside," said the magistrate, "but he told me to go on. Like every other young fellow he wanted his own way. But now I advise you not to try to make trouble. You have no claim on him—remember that—and he's gone away, I hear, for good. You'd better go straight back to this Home that you ran away from. No doubt they will help you through again. I understand many of the girls come back two and three times. In fact," he said turning to his friend, "that is one great objection to these Rescue Homes—they make things far too easy for girls of this class."

Helmi was staring past them vacantly. The pallor of her face was deepening.

"Now, look here," said the magistrate, sharply, "no tricks, no faints. You're an old hand at this, although you are not old in years, and you can't make me believe you are an innocent young thing, who has been deeply wronged. You're well able to look after yourself."

Helmi rose uncertainty. She reached out her hand for the certificate she had given him.

"This is no good," he said, "you may as well leave it here."

"Give it to me," cried Helmi, with some of her old fury, snatching it from his hand.

"Take it then, you tiger," he said angrily. "It's no good to you. Take it and get out of here! I am not running a Girls' Friendly Home here."

Helmi opened her purse to replace the paper, and as she did so a card dropped out. She stooped and picked it up. It was a white card bordered with maple leaves, and in the centre were printed these words: "Welcome to Canada!"

The sight of the card brought Helmi back to the night she had got it. It was her place-card the night the girls gave her the party. They were good to her and would be sorry for all this trouble which had come to her. This man who had caused her so much harm would suffer for it. Canada was all right. God was all right. This man was a devil. In a moment all her faintness was gone, succeeded by burning rage.

The two men watched her uneasily. There was something terrible in her anger. She walked over to the table and stood in front of Col. Blackwood. "You are a bad man," she said, "A devil—an old dirty, drunken devil. I hate you, and I will kill you. If my man does not come back to me I will kill you." Her voice was low, but it filled all the room. "It will be your fault, and I will come back here and kill you."

Before either of the men could recover from the shock she was gone.

When Helmi drove into the yard at the Boarding House old Slim, who had been watching for her, came to take her horse. Mrs. McMann came out, too, and the timekeeper, and the mine boss. They had been talking it over.

Helmi stepped out of the buggy and stood leaning against the wheel. Her face was white and lined, and her big eyes were feverish.

"Well, Helmi, what about it?" said Mrs. McMann, who could bear the suspense no longer. "What about it?"

"It is not in the book," said Helmi, wearily. "He says we are not married at all. He says Jack was fooling me. He is an old devil, that magistrate."

"Tough luck, Helmi," said the mine boss. "But we all know it wasn't your fault. He fooled you—that's all."

(To be Continued)

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

The real joy of living consists in making one's own mind a pleasant place to spend one's leisure moments.

GLEICHEN, ALBERTA, WEDNESDAY,**NEW CALENDAR PLAN**

Another effort to revise the calendar, no so as to give each month four weeks, is being considered by a committee of the League of Nations. Several plans have been proposed, one of which was recommended by M. B. Collier, director of the International Fixed Calendar League, appears to meet with most favor.

Collier's proposal is to divide the year into 13 months of 28 days each, every week and month to begin on Sunday, with the extra month added to the end of the year. It would be necessary to have an additional day at the end of December, and an extra day in leap years, but Collier suggests that we take the name of day of the week.

Thus each day of every month would always fall on the same day of the week—Sunday on the 1st, 8th, 15th, 22nd and 29th; Mondays on the 2nd, 9th, 16th, and 23rd, and so on.

From a practical standpoint the proposed calendar would have many advantages and would greatly simplify the keeping of accounts, computing pay rolls, calculating interest, recording statistical data and like.

Sentimentally, it would play havoc with anniversaries and church feasts by requiring other ways to be observed. Those who were born on the 29th to 31st, inclusive, of any month would be relegated out of their birthdays.

Still, Collier's calendar has had many times in the past when calendar changes have been made, and no one appears to have been harmed by the process.

LABOR TO MAGNATE

From a boy laborer in a steel mill to the head of the largest industrial concern in the world is a big jump, but James A. Farrell of United States Steel Corporation, has made it.

When his father was lost at sea with his ship, James Farrell was 15 years old and was forced to leave school.

He became a boy laborer in a steel mill in Illinois and in New Haven, Indiana, 12 hours a day.

It was the rule at that time that he was the rule at that time. But he somehow found opportunities for the study of books and for a college education were shattered.

Before he was 21 he was foreman of 300 men in a Pittsburgh wire factory, a steel mill in New Haven, Indiana, and was the rule at that time.

He became a boy laborer in a steel mill in Illinois and in New Haven, Indiana, 12 hours a day.

He became a boy laborer in a steel mill in Illinois and in New Haven, Indiana, 12 hours a day.

He became a boy laborer in a steel mill in Illinois and in New Haven, Indiana, 12 hours a day.

Survey Of H. B. Line To Fort Churchill Has Been Completed

Winnipeg.—The Hudson's Bay Railway line has been surveyed as far as Fort Churchill and will soon reach the North West corner. Major J. L. Charles, reconnaissance engineer of the Canadian National Telegraph Co., the telephone, cable engineer and other members of the party of 21, have returned to Winnipeg.

A team reached the camp on May 8. Major Charles said, "left home on the 18th." They traveled by dog to the trail road, 42 miles east from the mouth of the Churchill River in two days. After camped a day, they took horse to the trail, mile 256, and came into Fort Churchill on May 12. "There was a very mild winter," the engineer said, "and lost only six out of our 10 dogs."

"A week ago Sunday the weathers turned at Churchill. The first team which arrived on St. Patrick's Day with the mail had been delayed by weeks of bad weather. The men were very hard up financially because the mail runners of their sledges thawed out." He explained that British contractors had been paid \$100 a ton for the supplies sent to Churchill, while the Hudson's Bay Company had paid \$100 a ton for the same articles.

"It is a very good practice, so long as the weather is like it is," he said. "We had the Indians to thank for the way we left and our cars were quite a novelty to them."

The Department of Transport and Canada had a big hand in getting the Hudson's Bay line over the Churchill River. Mr. Charles mentioned, and the newly-arrived telegraphers stated, that the line had been completed in three months. They were in constant touch with the sledge parties every hour.

The telegraphers, however, in Canada, were pushing the work of building the railway, he stated, and all was in readiness for the summer. Two dredges had been brought down the river going on north from Mile 354. One had been erected and cache wells established. Dredges were used in removing the sand, which would commence grading as soon as the water allowed. Tom Stewart, supervisor of the Hudson's Bay Company, who has just returned from a trip which took him for a week to the Arctic, said that the new telegraphers of Churchill say that by the end of May there would be 1,200 men on the job.

Will Discuss Section B7d

Measure To Come Before House For Fifth Time

Ottawa.—For the fifth time since 1924, a bill providing for a reduction in taxation which may take place after the completion of the railway section will be introduced shortly in the House of Commons.

Notice of motion again called for the bill to go down on a day's order paper by Hon. Robert F. G. Minister of Immigration.

On every occasion that the bill was introduced, the measure passed; however, was killed each time by the Senate.

U.S. Wants Canadian Students

Because Educational System Is More Through Says English Editor

London.—The editor of *Canada's Home Journal*, who does not know that it is a land of cold winters, cool heads and warm hearts, John Waller, co-president of the Times, London, recently wrote to me, when he spoke at a Canadian club luncheon:

Referring to the cost of Canadian schools to the United States, Mr. Waller said the Canadian educational system is so thorough that United States institutions need not compete here."

Stresses Duty To Empire

Association With Britain Is South Africa's Greatest Security Says

Cape Town, South Africa.—Declaring that no country in the world could seriously interfere with a day's trial from Cape Town, with one of the most valuable parts of the world, and that South Africa's association with the British Empire would be a guarantee of safety, Jan Christian Smuts, former Premier and leader of the South African delegation to the League of Nations, declared last night that General H. M. Harbin had introduced in the House of Assembly the question of possible South African entry in the event of Britain being at war.

The great general, who has been in the service of the British Empire since he was born, concluded his speech by urging his fellow countrymen to recognize their responsibility.

Taking Risk On Dirigible

Lloyd Will Project R-100 On Flight Across Atlantic

Montreal.—The British government has undertaken the risk of insuring the British dirigible passenger liner R-100 for its forthcoming flight across the Atlantic.

The rate, about 20 guineas per head, is considered as moderate, indicating the confidence of the syndicate in the safety of the ship.

If the ship comes down at sea, it will be insured for the value of the cost of repair, while if she is lost altogether, they will pay to the owners the amount of the original purchase price.

The dirigible, which is expected to make its first flight this spring, equipped with 120 passengers, will fly at 100 miles an hour, and has a cruising range of more than 5,000 miles.

It is designed to accommodate 100 passengers and to carry 10 tons of mail.

Propose General Snouts For Defence Minister

Former South African Premier Suggests South African Snouts

London.—The statesman who suggested that General Jan Christian Smuts, former premier of South Africa, and a member of the British Empire, should be appointed to fill the post of Minister of Defence in the British Government, has now proposed the combining of the three fighting forces, land, sea and air, into one effective unit, which should be able to transport any unit not approved by the board.

He suggested that the proper type of coal was brought east, Mr. Ferguson said. He suggested that in his opinion the coal should not be allowed to import, unless it can be utilized for educational purposes of this nature.

At the end of the day of the debate, he said that the proper type of coal was brought east, Mr. Ferguson said.

He suggested that in his opinion the coal should not be allowed to import, unless it can be utilized for educational purposes of this nature.

General.—Those engaged in Canadian mining in British Columbia have not made representations as to getting into the coal market," he said.

"I could only bring him, General, to see him, and he would have to be free to do the same thing being elected to represent him here."

Viscount Cave Dead

Recently Elected Post Of Lord Chancellor Being Filled

Burdett, Senatorial Hon. Viscount Cave George, who recently resigned as Lord Chancellor after a distinguished career at the bar, died March 28.

Viscount Cave, who was born in 1855, had been a partner in the British law firm of Cave & Tait, becoming Lord Chancellor in 1892.

He was appointed solicitor-general in the first coalition ministry in 1886, and was succeeded by Sir Evelyn Lloyd George, the home secretaryship. He was created a peer in 1918.

His son, Viscount George, a barrister, was a member of parliament.

Have Withdrawn From Council

Winnipeg.—The United Grain Growers' League, which has gone into the grain control system, has withdrawn from the Canadian Council of Agriculture for a number of years, having withdrawn from the Canadian Council of Agriculture.

Mr. W. G. Goulden, president of the United Grain Growers' League, said yesterday that the withdrawal was due to the fact that the U.G.G.L. had been forced to withdraw from the Canadian Council of Agriculture for a number of years, having withdrawn from the Canadian Council of Agriculture.

Not Feasible For Canada

U.S. Bank System Impossible In Canada

Ottawa.—The Canadian banking system, organized on the same basis and along the same lines as the U.S. system, would be almost impossible in Canada.

This was the opinion expressed by Governor W. P. Hardin, of the Royal Bank of Canada, before the banking committee of the House considering a proposal to implement in Canada's banking system.

The Federal reserve board of the United States has a new bank, Governor Hardin told the committee. "The new bank is the Federal Reserve Bank of New York, which is trying to get a general acceptance of the Federal Reserve Banks in the country. It can fix the character of the currency which may be accepted but cannot compel a bank to make a loan."

Experiment With Fertilizer

Alberta Saskatchewan And Manitoba Vary Standard For Spring Sowing

Winnipeg.—Manitoba is participating in experiments that are being conducted in various parts of the country, that are being conducted in British Columbia, as a fertilizer, J. H. Evans, manager of agricultural extension, who has been working on reports that six cars of the by-product had been shipped to points of the prairie.

The results of the experiments are being watched with great interest, Saskatchewan and Manitoba are getting along in this respect, said Mr. Evans.

The idea is being taken up of the fertilizer over wide a range of territory as possible, Mr. Evans said.

Some of the experiments are being watched with great interest, Saskatchewan and Manitoba are getting along in this respect, said Mr. Evans.

NOTED ARCTIC EXPLORER

Vilhelmur Stefansson, Arctic explorer, who is trying to prove men can live off the land in the north, has now dieted for 100 days. He claims his all meat diet will not bring on scurvy as is generally believed.

Discuss Activities Of Communists In Canada

Country Being Ploughed With Red Literature Senate Is Told

Ottawa.—The Senate recently discussed the dangers of communism propagating in Canada, and issued a statement adopted at length by Senator C. P. Beaton, who enquired what the Government was doing to prevent the spread of communism.

Various religious bodies had petitioned the Government to close Communists out of Canada, the Ultraists in Canada fell easy to the Red agitators.

There were 40 such schools in the country, attended by 2,000 children, and Senator C. P. Beaton, of Labrador, Teniente was also used for Communist meetings. Immigrants were taken there to listen to these meetings, the Communists being the ones that were most popular.

Senator Greenway, of Alberta, informed the Senate that the Royal Canadian Mounted Police knew of these meetings and kept the Government informed.

For Promotion Of Peace

Miss McPhail's Motion For Creation Of Peaceful Department Is Withdrawn

Ottawa.—A peaceable society, headed by Miss Agnes McPhail with her mother for the creation of a department for the promotion of peace, Miss McPhail expressed the hope that between now and next session of Parliament would set up an organization to tell world of the progress of peace.

Miss MacPhail said: "While we have a superfluous committee, we have a committee which will always be dangerous of war. It can't be right that we can always be right."

She added: "We are getting along in this respect, but we must be more aware of war. They placed a higher value on human life because they suffered a great deal for that for this reason, they should be more aware of war."

Miss MacPhail said: "While we have a superfluous committee, we have a committee which will always be dangerous of war. It can't be right that we can always be right."

Amendments Provide For The Grading Of New Wheat Varieties

Apply For Railway Charters

3,333 Miles Of Railways In Canada Involved In Applications

Ottawa.—The Canadian Government, Minister of Railways and Canadas, informed the railway committee of the House of Commons that charters for 3,333 miles of railways in Canada were applied for by the Canadian National and the Canadian Pacific Railways. The cost of this mileage is estimated at \$24,000,000.

In addition, there were applications before the provincial legislatures which were granted for the construction of railroads in the provinces, and the total estimated cost of all these railroads is approximately \$1,400,000.

The minister told the committee that it was not possible at present to lay down the principle that no acre of land shall be granted to a railroad company for the construction of a railway unless the land contains 100 per cent of hard white wheat.

Alberta Wheat Grading Higher Than Last Fall

Ottawa.—The wheat grading higher than last fall, and the grain is being graded higher than the regular regulars, said Miss McPhail.

Ottawa.—The wheat grading higher than last fall, and the grain is being graded higher than the regular regulars, said Miss McPhail.

Ottawa.—Amendments to the Canada Grain Act to provide for grades of wheat and the large number of new wheat varieties will be made by Parliament this autumn. An amendment to this is contained in notice of motion of Hon. J. A. Hill, on the paper.

The bill is being introduced by Hon. James Macleod, Minister of Railways and Canadas, in addition to providing for a number of entirely new grades for new varieties of wheat, and is provided for new grades for old wheat.

The act, as it stands, does not include any of the new wheat varieties developed with the past few years.

In regard to wheat, the Bill provides for a maximum of 96 per cent of the wheat produced.

No 1,000 bushels Western spring wheat should contain 96 per cent of wheat to qualify as hard white wheat.

No 1,000 bushels Western spring wheat which is excluded from the premium grade on account of damage and practically free of damaged kernels and still contain 96 per cent of hard white wheat. It may contain 30 per cent of soft white kernels. It shall not contain more than one per cent of Amber Durum, Red Durum or White wheat.

No 3,000 bushels Western spring wheat which is excluded from the premium grade on account of damage and shall be reasonably clean, weighing not less than 50 pounds to the bushel. It shall contain not more than 10 per cent of red spring or winter wheat. It shall not contain singly or in any combination, more than two per cent of Amber Durum, Red Durum or White wheat.

No 5,000 bushels Western white wheat which is excluded from the premium grade on account of damage, and shall be reasonably clean, weighing not less than 50 pounds to the bushel. It shall contain not more than 10 per cent of red spring or winter wheat, it shall not contain singly or in any combination, more than one per cent of Amber Durum, Red Durum or White wheat.

No 10,000 bushels Western white wheat which is excluded from the premium grade on account of damage, and shall be reasonably clean, weighing not less than 50 pounds to the bushel. It shall contain not more than 10 per cent of red spring or winter wheat, it shall not contain singly or in any combination, more than one per cent of Amber Durum, Red Durum or White wheat.

No 20,000 bushels Western white wheat which is excluded from the premium grade on account of damage, and shall be reasonably clean, weighing not less than 50 pounds to the bushel. It shall contain not more than 10 per cent of red spring or winter wheat, it shall not contain singly or in any combination, more than one per cent of Amber Durum, Red Durum or White wheat.

No 40,000 bushels Western white wheat which is excluded from the premium grade on account of damage, and shall be reasonably clean, weighing not less than 50 pounds to the bushel. It shall contain not more than 10 per cent of red spring or winter wheat, it shall not contain singly or in any combination, more than one per cent of Amber Durum, Red Durum or White wheat.

No 80,000 bushels Western white wheat which is excluded from the premium grade on account of damage, and shall be reasonably clean, weighing not less than 50 pounds to the bushel. It shall contain not more than 10 per cent of red spring or winter wheat, it shall not contain singly or in any combination, more than one per cent of Amber Durum, Red Durum or White wheat.

No 160,000 bushels Western white wheat which is excluded from the premium grade on account of damage, and shall be reasonably clean, weighing not less than 50 pounds to the bushel.
